

## BLACK FELT SHEET FOR INTERIOR CLADDING

Use: Co-extruded rigid backing solution, designed to optimize the visual appearance of open joint cladding, while providing thermal, acoustic and sanitary performance.

Reference	3281
Dimensions	3000 x 650 x 2,9 mm
Density	600 g/m <sup>2</sup>
Colour	Black

Extruded plastic sheet with fabric integrated by co-extrusion, this product is designed for use as a black backing behind cladding.

It helps to:

- Hide the supporting wall (plasterboard, concrete, etc.)
- Accentuate the visual relief of the cladding by creating a marked contrast between the boards.

Its rigid form greatly facilitates installation, without the need for complex fastenings.

In addition to its aesthetic function, the panel contributes to :

- Better sound and heat insulation
- A healthier indoor environment thanks to its anti-allergenic and anti-mite properties
